Computer Science Engineering graduate with a focus on full stack .NET development. Seeking to apply my skills in web technologies and problem-solving to contribute to innovative projects.

WORK EXPERIENCE

Web Development Intern

Feb 2022 - Mar 2022

LeMenizInfotech

Puducherry

1. Learned the basics of web applications.
2. Learned HTML, CSS, and JavaScript as Front-End technologies.
3. I can learn how to create a web page and how it can run on a server.
4. Contributed to the adoption of modern development tools, reducing the time required for new feature implementation.
5. Demonstrated strong problem-solving skills by resolving complex UI issues.
6. Performed on the Naan Mudhalvan - Niral Thiruvizha at TamilNadu level.

EDUCATION

Bachelor of Engineering

Jan 2020 - Jan 2024

IFET College of Engineering

Computer Science and Engineering

HSC

Jan 2019 - Jan 2020

Swami Vivekananda Vidhyalaya Hr.sec School, Puducherry

Computer Science

Achieved Rank holder in class

SSLC

Jan 2017 - Jan 2018

Swami Vivekananda Vidhyalaya Hr.sec School, Puducherry

Led our class room

PROJECTS

Portfolio webpage [↗](#)

Developed portfolio page using HTML, CSS and JavaScript.

Achieved project completion within 2 days.

Add-Table-Data [↗](#)

Data table can be Created for managing the database to store the data by getting input fields ,like name, Age, Address, Email.

Achieved project completion within 1 day.

To-do-app [↗](#)

Created the To-do-app its like the notes making ,to add the data and data can be stored in a list, that can be un comfortable to delete the data.

Achieved project completion within 1 day.

Getting the user input Email and Password on SignUp that can be stored on a local storage and to login input can be fetch the data ,to compare and show the message Success or Invalid message, that way to Form validation will be Implemented.

Achieved project completion within 1 day.

Weather app [↗](#)

Created the Weather app by using HTML ,CSS and JavaScript to Fetching the data on a Dummy weather API.

And the data managed by the JavaScript Higher order function map, filter.

Achieved project completion within 1 day.

Machine Learning in IoT Agriculture [↗](#)

Jan 2024 - May 2024

to Classify Micronutrients and Boost Crop Productivity.

Designed the device to Classify soil Micronutrients, IoT sensors, Machine learning, data prediction, plant growth, fertility of the soil, Decision making, yield of the crops, IoT device.

Achieved project completion within 6 months.

Hospital Management System [↗](#)

Jan 2023 - May 2023

Designed Hospital Management System (HMS) Automated hospital front office operations by managing patient and doctor details, enhancing administration, patient care, and profitability. The system uses MySQL for database management, offering secure and efficient data handling.

Achieved project completion within 6 months.

SKILLS

Programming Skills: HTML, CSS, JavaScript, CSharp, Python Basics, SQL Quires

Technologies : ASP.NET Web Application, ASP.NET MVC

Data base: SQL server management studio, SQL Queries, Stored Procedure

Tools: VS code, VS community version 2022

Soft Skills: Teamwork, Problem-solving, Attractive learning

LANGUAGES

Tamil (Native proficiency) • **English** (Elementary proficiency)
